Professional Summary

Site Reliability Engineer with **4+ years of experience** in cloud operations, application support. Skilled in managing **large-scale infrastructures (30,000+ servers)**, resolving critical incidents and ensuring **99.9% uptime** through automation and proactive monitoring. Proficient in **AWS, GCP, Azure, Docker, Python, CI/CD pipelines and modern observability tools**. Experienced in **incident management, cloud migrations, infrastructure optimization**. Recognized for driving **cost savings, operational efficiency and reliability improvements**, with a proven ability to bridge **support, operations and DevOps practices** to deliver resilient systems.

Professional Experience

Site Reliability Engineer – Kissht | Sep 2025 – Present

- Implemented **Prometheus, Grafana, New-Relic monitoring and alerting** reducing **MTTR by 60%** and minimizing manual monitoring effort.
- Automated **Python-based log analysis** and optimized **Sentry log ingestion**, cutting troubleshooting effort by **90%** and reducing alert noise and costs.
- Supported **100+ feature releases, migrations and bug-fix deployments**, monitoring systems pre and post-deployment to ensure stability.
- Improved system reliability through structured **root cause analysis (RCA)** and preventive remediation.
- Executed **instance refresh operations** and post-change validation to ensure services were healthy and compliant with SLAs.
- Monitored **end-to-end user journeys** using **Metabase, Percept, and Clarity session recordings**, preventing post-release regressions.
- Collaborated closely with development teams to resolve production issues quickly and maintain **high availability**.

Cloud Engineer - HCLTech | Dec 2021- Sep 2025

Client: State Street Corporation

- Delivered **L2/L3 support for 30,000+ servers**, ensuring **99.9% uptime** while resolving **250+ monthly incidents** within SLA.
- Supported **production deployments and releases** across PROD, UAT, and DEV environments, reducing release resolution time by **15%**.
- Diagnosed and resolved **CI/CD pipeline issues**, implementing automation fixes that cut repeated incidents by **30%**.
- Migrated enterprise applications from **on-premises to AWS**, achieving **zero downtime** and stable integrations.
- Developed **Python/Bash automation scripts** for patching, monitoring and reporting, reducing manual workload by **40%**.
- Orchestrated containerized applications using **Docker and Kubernetes**, accelerating deployment cycles by **25%**.

Key Achievements

- Achieved **10% cost savings** via Private Cloud resource optimization and idle resource clean-up automation.
- Elevated system uptime to 99.9% by implementing pre-release sanity checks and proactive monitoring.
- Recognized as **Performer of the Month (Jan 2025)** at **HCLTech** for contributions to reliability and automation.

Certifications

- [AWS Certified SysOps Administrator – Associate](#)
- [Oracle Cloud Infrastructure 2024 Certified Foundations Associate](#)
- [Associate Cloud Engineer](#)
- [Professional Cloud DevOps Engineer Certification](#)
- [Professional Cloud Security Engineer Certification](#)

Education

- Bachelor of Technology in Computer Science & Engineering from **Dr. A.P.J. Abdul Kalam Technical University, Lucknow**, 2020 with **Honors**.

Skills

Cloud & Infrastructure: GCP, AWS, Azure, Private Cloud, Load Balancers, VM Management

DevOps & Automation: Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions, Harness), Python, Bash

Monitoring & Logging: Dynatrace, Prometheus, Grafana, ELK Stack, Splunk, New Relic, Sentry, Clarity, Percept

Databases: MySQL, SQL Server, Metabase

Security: IAM, Patch Management, Vulnerability Remediation

Soft Skills: Incident Handling, RCA, Problem Solving, Collaboration
